Exercise 4

1. The African elephant is  (heavy) land animal in the world.
2. Lions are  (big) members of the cat family.
3. The mosquito is  (dangerous) animal in the world.
4. The Falabella miniature horse is  (small) type of horse.
5. Dogs are  (popular) pets in the world.

1. Elephants are the heaviest land animals on Earth.

2. Lions are the biggest members of the cat family.

3. The mosquito is the most dangerous animal in the world.

4. The Falabella miniature horse is the smallest type of horse.

5. Dogs are the most popular pets in the world.

Exercise 6

1. An adult tiger is  animal. It is  a lion and a leopard together! (heavy / small)
2. Adult lions are  adult leopards, but adult tigers are  animals. (short / long)
3. A tiger's life is  a leopard's life, but a lion's life is  of the three cats. (short / long)
4. The three cats run fast. A tiger is  a leopard, but a lion is . (slow / fast)
5. Tigers are  lions at climbing, but leopards are  climbers. (good / bad)

Exercise 7

**The Phoenix**

The phoenix is an interesting mythical creature. It's yellow, orange, red and gold, so it is  (colourful) than other birds. It also sings beautifully. Its songs are  (nice) than a canary's songs. The phoenix is also  (strong) as many human beings and it is probably the  (intelligent) bird. But that isn't all.

The phoenix lives for 1,000 years, so its life is the  (long) of all birds. When it's ready to die, the phoenix builds a fire and goes into it. But this death is  (sad) as usual because a new bird comes out of the fire and begins its 1,000-year life.
